## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by U. S. Publication No. 2003/0199767, U. S. Application No. 10/232,428 to Cespedes et al.
3. Regarding Claims 1, 3-5, and 7-10 Cespedes teaches an apparatus for assisting navigation in a vessel comprising: a sensor probe for acquiring local images that characterize the vessel at the point where the particular local image is made, which sensor probe can be moved along the vessel (Abstract); a memory for storing a sequence of local images that is obtained in the course of the movement of the sensor probe along the vessel; a data-processing unit that is arranged to sort a further local image of the vessel into the sequence that is stored in the memory.(Paragraph 0134)
4. Regarding Claims 2 and 6, Cespedes teaches that the sensor probe is an intravascular ultrasound system or a means for performing optical coherence tomography. (Abstract and Claim 1)
